

Industrial Cable Tools

Ratcheting Cable Cutter

This Ratcheting Cable Cutter can accommodate copper or aluminum cables up to 1-1/4" diameter. The precision ratcheting design provides added torque and makes it easy to cut large cables in tight spaces. The blades are hardened steel and can be resharpened, providing longer life. The tool frame is made of carbon steel making it rust-resistant. The handles are coated with anti-slip PVC providing a comfortable grip.

Industrial Cable Tools

Large Handle Cable Cutter

This large handle cable cutter is a high-quality tool that can easily cut copper or aluminum cables up to 1-1/2" in diameter. The blades are forged chromium-molybdenum steel that make clean cuts with minimal distortion to cable conductors and jacket. The blades are rust resistant and can be resharpened, extending the life of the tool. The aluminum handles are strong, lightweight and feature anti-slip grips. 24" length.
