

## Cable Glands

**Kord-Gard® Nylon Mesh Strain Relief**

Each Kord-Gard® Nylon Mesh Strain Relief package includes the cable gland body, O-ring and locking nut. Our nylon friction ring provides uniform compression for a proper seal. It prevents bushing damage and results in a tight, uniform seal on the cord surface which seals out oil, chemicals and other contaminants. The partial double-weave stainless steel mesh is a unique drop-in basket design for easier assembly and provides exceptional gripping strength, longer cord life and corrosion resistance.

**Ratings**

REACH Compliant

**Performance Characteristics**

✓ Corrosion Resistant ✓ Extra Hard-Duty Strain Relief ✓ Extra Tight Seal ✓ Operating Temperature: -40°C to 107°C

**Engineered to Resist**

Flexing

Tension

Chemicals

**Features & Benefits****Partial Double-Weave Stainless Steel Mesh**

Provides exceptional gripping strength. Resists corrosion.

**Unique Drop-In Basket Design**

Makes for an easier assembly.

**Friction Ring**

Provides uniform compression for a proper seal. Prevents bushing damage.

**Synthetic Sealing Bushings**

Creates an environmental seal against dust, moisture, chemicals. One part number covers a variety of cord diameters.

**Security Yellow Nylon Compression Nut and Threaded Body**

Resists impact and corrosion. Easy to remove and reuse.
