

Custom Solutions

## Cable Carrier Systems

ATPC offers custom cable carrier systems with our highly flexible industrial strength cable and corrosion-resistant materials tailored to your carrier dimensions and clearance requirements. Our plug-and-play systems are engineered with a focus on integrity and quality for optimal performance. Your new system will be delivered to you bundled and ready for installation, eliminating labor and downtime.

### Features & Benefits

#### Turn-key Ready

Bolt in ready and fully outfitted with ATPC cable, cable assemblies, and pre-terminated mechanical lines.

#### Wide Range of Material Options

Available in plastic, steel, and stainless-steel variants, ensuring durability against various forms of wear and tear.

#### Open or Enclosed Configurations

Available with optional plastic or aluminum lids to safeguard against debris.

#### Application Specific

Loaded and balanced correctly to maximize longevity. Variety of frame stay options and separators for optimal cable routing.

Custom Solutions

## Custom Reel Enclosures & Cable Reels

ATPC's Custom Reel Enclosures and Cable Reels offer a well-organized solution for storing electrical cables efficiently and ensuring a smooth deployment process. Our team of skilled engineers works closely with you to design a personalized reel enclosure and industrial cable reel solution that fits your specific needs. We provide a variety of design options, materials, and sizes for you to choose from, ensuring an application specific solution tailored to your unique requirements.

### Features & Benefits

#### Plug & Play Design

Turn-key ready and loaded with ATPC High-Performance cable, cable assemblies and everything in between for your specific application.

#### Material Options

Can include aluminum, galvanized steel, stainless steel, and many more dependent on your environment and requirements.

#### Fully Customizable

Choose from a variety of drives, cranks, power supplies, and sizes to meet your specific demands.

Custom Solutions

## Custom Storage & Deployment Trailer

ATPC's Application Engineers and Product Development Managers will work with you to provide a custom storage and deployment solution for any temporary power requirements. Based on the possible natural disasters in your region, your work environment or your facility's safety specifications — the storage and deployment trailer can be custom designed to keep materials in optimum condition until they are needed and allow for fast and easy deployment.

### Ratings

Federal Motor Vehicle Safety Standards Compliant

### Features & Benefits

#### Aluminum Frame

Lightweight and corrosion resistant, with a high strength-to-weight ratio.

#### Galvanized Steel Frame

Excels in strength, corrosion resistance, durability, and low maintenance.

#### Power Plant Options

Offerings include gas/hydraulic, electric/hydraulic, full electric, and lithium-ion battery.

#### Worker Safety

Allows the unit to do the brunt of the work instead of personnel to reduce the chance of an OSHA recordable event.

#### Fully Customizable

Trailers can include open or enclosed reel stands, as well as a full 360-degree turret with a hydraulic slip ring.
