

Custom Solutions

Aluminum Pendant Box Assemblies

Aluminum Pendant Box Assemblies protect the wiring from the ingress of dust, dirt, moisture, and chemicals. The enclosure also prevents buttons from being damaged due to impact and heavy load. Each assembly is delivered pre-wired to customer specifications, making it ready to install on arrival. Boxes are available as 4-button and 8-button assemblies. 2-button and 6-button versions are also available with blanks.

Ratings

Features & Benefits

Aluminum Split Shell

Provides defense against impact and abrasion in heavy duty, industrial applications.

Internal Sealing Gasket

Provides an environmental seal to effectively safeguard against the ingress of liquids and particles.

Silicone Booted Buttons

Provides an environmental seal for a variety of button configurations, interlocks, and speeds.

Strain Relief

Custom strain relief adapters to limit the failure points from tension force.

Plug & Play Design

Pre-terminated with offerings for quick disconnect plugs and receptacles to reduce downtime.

Custom Solutions

Polycarbonate Pendant Box Assemblies

Polycarbonate Pendant Box Assemblies come pre-wired to your specifications and ready for immediate installation. Although they cannot handle as much impact as aluminum, they are lighter and can accommodate up to 12 buttons, making them a popular solution for light duty applications.

Features & Benefits

Polycarbonate Shell

Weighs less than 2 pounds, while remaining durable for industrial applications.

Internal Sealing Gasket

Provides an environmental seal to effectively safeguard against the ingress of liquids and particles.

Strain Relief

Custom strain relief adapters to limit the failure points from tension force.

Plug & Play Design

Pre-terminated with offerings for quick disconnect plugs and receptacles to reduce downtime.

Custom Solutions

Electrical Connection Enclosures

ATPC's expert engineers specialize in tailoring custom electrical enclosures to perfectly align with the unique requirements of your site. Collaborating closely with your team, we'll identify the optimal enclosure solution for the rapid and secure connection of your emergency power equipment. Our diverse range of enclosure designs and connection styles offers a multitude of choices to suit your exact needs and specifications.

Features & Benefits

Plug & Play Design

Pre-terminated and ready to work out of the box with ATPC's Single Pole Power Assemblies to reduce downtime.

Material Options

Offered in carbon steel or stainless steel with a variety of size options for an application specific solution. Enclosure door is hinged and lockable.

PA22 Receptacles

Transfer molded PA22 receptacles with closure caps to prevent the ingress of liquids and particles. Each receptacle is phase color coded for identification.
