

TPC Featured Products in Food & Beverage Applications

Super-Trex® Ultra-Gard™ Portable Cord

Super-Trex® Ultra-Gard™ Portable Cord is highly flexible, rated for extra-hard usage, and has excellent resistance to impact, cutting, abrasion, oils, and most industrial chemicals.

- This SOOW portable cord features tinned, extra-flex stranded copper conductors and live-flex insulation with no-wick reinforced fillers and a 100% fabric serve
- The security yellow TSE jacket provides excellent protection against pulling and twisting and allows for extreme all-weather flexibility

Chem-Gard® 200 Unshielded Single & Multi Conductor Cable

TPC's Chem-Gard® 200 Unshielded Conductor Cables have excellent resistance to chemicals, abrasion and high heat.

- Rated at conductor temperatures as high as 200°C and as low as -60°C
- Available in many configurations and in a wide variety of colors & sizes
- Small diameter allows the product to be used in areas that require a tighter bend radius
- Built to withstand the harsh chemicals in your washdown areas

Trex-Onics® Low Capacitance VFD Shielded Power Cable

Designed for superior performance, its heavy-duty tinned copper braid protects equipment and motors from damage caused by electrical noise and 'stray voltage'. It also provides a shield against electromagnetic and radio frequency interference and a low-impedance path to ground.

- Finely Stranded Tinned Copper Conductors improve flexibility and extend conductor life in dynamic applications. Conductors are alpha-numerically marked for ease of identification. The cable is constructed to withstand corona voltages up to 2,000 volts
- XLPE Insulation System offers high dielectric, tensile and mechanical properties

Quick-Connex™ Cordsets

TPC's Quick-Connex™ cordsets and cable assemblies that make the replacement of electrical control devices quick and simple.

- Available in Mini, M12 DC Micro, AC Micro, M8 Nano and more
- These molded and keyed cordsets provide rapid and secure connect and disconnect and ensure a water, oil, and dust-tight seal
- Built to withstand the harsh chemicals in your washdown areas
- IP69K Rated
