TOP DRIVE/RIG 286 APPLICATION IN OIL DRILLING

CUSTOMER PROBLEM:

The cable the customer was using was failing too quickly in a cold environment paired with constant tension.

TPC SOLUTION:

The maintenance supervisor replaced the cable in this top drive application with TPC's 4/4 Trex-Onics® variable frequency drive cable because of the flexibility in all weather conditions.

CUSTOMER'S RESULT:

In this application, the customer saved \$1,086.40 in material costs, \$112 in labor costs and 13 hours in increased production. Currently, this product is still in use after 6 months. If they hadn't changed to TPC cable, they would have changed this cable out twice in this amount of time.

TPC PRODUCT: Trex-Onics® VFD Shielded Power Cable
