

Molded "Y" & "T" Splitters

TPC offers a wide range of compression transfer molded cable splitting options. All of them are custom designed to meet the needs of each individual application. We are able to accommodate both single and multiple conductor options in numerous gauge sizes. The splitters are designed to handle the abuse of the harshest applications. We offer both a blunt cut cable option or we can add any connectors needed to fit your application.

FEATURES & BENEFITS

1. SUPER-TREX® WELD CABLE — First line defense against oils, ozone and UV exposure as well as most chemicals. Extreme all weather flexibility. Proven performance lasts up to 8 times longer than standard weld cables.

2. COMPLETELY MOLDED DESIGN — All rubber construction reduces cable stress and provides an environmental seal between the cable and the splitter.

3. BOTH SINGLE AND MULTIPLE CONDUCTOR OPTIONS —

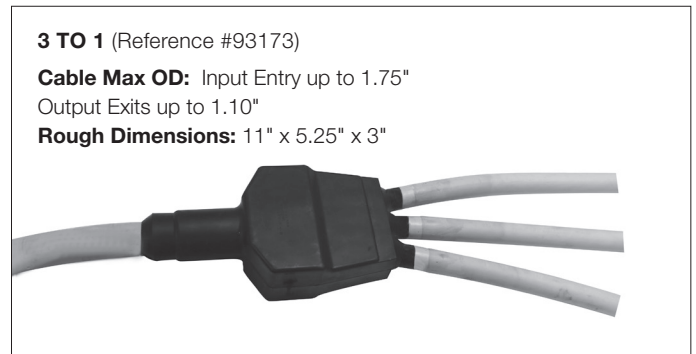

These splitters allow both options of single pole connections and multiple pole terminating.

4. CONNECTORS AVAILABLE ON REQUEST — TPC's engineering group is familiar with many different types of connectors and can source what you need. Make the cable splitter a plug-and-play solution to fit your specific application.
